### **Wichita Falls – Wichita County Public Health District Week of February 1 Vaccine Update**

Wichita Falls, Texas – The Wichita Falls – Wichita County Public Health District will be receiving 1,950 doses of the Pfizer vaccine this week. Due to the successful transfers and vaccinations last week, the Health District will once again partner with the Clinics of North Texas, North Central Texas Community Healthcare Center, United Regional Health Care System and Electra Hospital District. Each facility, including the Health District, will administer their allotment of doses this week. Please note, individuals do not need to call the facilities asking for an appointment. Each facility will work through the State prioritized groups, Phases 1A and 1B, reaching out directly to their eligible patients in a systematic fashion. The Health District will continue to utilize their current waiting list to schedule appointments.

The Health District is still moving forward with plans to transition to an online, high-volume vaccine management and reporting system. If approved for purchase during Tuesday's City Council meeting, the Health District will immediately begin working to transition the original waiting list to the new system. Once the transition is complete and the software has been implemented, the Health District will inform the public. At that point, further details will also be released regarding signups for the COVID-19 vaccine waiting list.
