Memorial Auditorium Sewer Project to Begin

Wichita Falls, Texas – Work is scheduled to begin on the Memorial Auditorium Sewer Project Wednesday, June 16, 2021. Construction is expected to last approximately two weeks, weather pending, while the new sewer line, manholes and junction box are installed.

Due to the construction, both lanes of 6th Street from Broad Street to approximately 300 feet east will be closed to traffic. Please be mindful of the detour signs and construction crews working in the area. The City of Wichita Falls apologizes for the inconvenience and appreciates the public's patience while Public Works completes this important project.
