Subject: Change of Policy Regarding On-site Sewage Facilities

In order to streamline our on-site sewage facility inspection process, ensure that our inspections are consistent, and accurately represent the condition of the on-site sewage facility system, all existing inspections will require the system to be pumped. We will no longer accept applications for existing inspections without knowing which licensed waste hauler will pump the system. The inspectors will coordinate with the licensed waste hauler of your choice to arrange an appropriate inspection time.

Please also remember to have the system ready for inspection with all access ports exposed. Due to safety and liability concerns, our employees will not dig up the tanks. If you find that the system is a safety hazard when uncovered, please be aware that it is the responsibility of the property owner to ensure the tank remains secure.

Samantha Blair, RS

Environmental Health Administrator
