## **Street to Close Temporarily for Sewer Rehab Project**

Wichita Falls, Texas- The Wichita Falls Utilities Department will be conducting a scheduled rehabilitation of sewer lines within its Wastewater Collections System during the week of January 16, 2023.

The Sewer Rehab work will be performed in the 1200 Block of 7th Street, just west of 7th and Burnett, which will require the scheduled closure and detour of both west and east-bound traffic on 7th Street. See map on page 2.

This scheduled closure and detour will begin at 8:30 am on Monday, January 16, 2023.

During this time citizens will need to exercise caution while traveling in the area to protect themselves and the City workers that will be in the street repairing the infrastructure.

We appreciate your continued understanding and patience as we continue to maintain the wastewater collections system for the community.

For more information, you may contact the Wastewater Collections Division at (940) 397-2545.
